Thanks Mazeeda. Attached and copied below are my suggested edits for the Report.

Not Responsive

Limetree Bay Terminal (LBT), St. Croix, USVI, Air Permit Questions: On 4/5 the Assistant Administrator for Air signed EPA's response to questions raised by LBT regarding its plans to restart refinery operations at the facility. EPA concurred that: (1) restarting of the refinery's idled units for the MARPOL Project should not be treated as a new stationary source under the current Reactivation Policy; (2) the MARPOL Project and the Renewable Diesel Fuel Project are independent of each other and therefore separate projects for PSD applicability; and (3) constructing the Single Point Mooring project would be considered a modification to an existing emissions unit rather than a new emissions unit.

Subject: Draft highlights for the Admin

Importance: High

Good morning Pete.

Per our conversation yesterday, attached is my version of the draft highlights to the Admin for this week. Also attached are the regional compiled highlights as well as the ORC highlights to OECA.

Please review and let me know what changes you would like to make to this document.

Thank you.

Mazeeda Khan, PE, PMP
